What you will learn:

- The current technology trends in IT deployment
- Our business operation and services
- Product demo and hands-on experience

CREATIVITY

CRITICAL
THINKING

COMMUNICATION

COLLABORATION

A VISION FOR THE FUTURE:

Virtual Reality

VR is a tool that epitomizes the idea of sharing one's experiences with others and learning about their own experiences. It could be the next breakthrough in educational technology.

Chromebook for Education

Chromebooks are affordable, shareable devices that come with support, management, and built-in access to G Suite for Education and other educational apps.

Windows Devices for Education

Choose from a selection of Windows 10 devices with features that range from ruggedized and spill-proof for student use to all-day battery life, all with the power, performance, and security.

Collaboration for Education

Keep everything you need right at your fingertips with mobile devices, education apps, and files built into every class. Empower student voice and choice with rich conversations, video, and fun content.
